

ACROSENSE™ Fluid Control Platform

4 Key Take Home Points

Dramatically
Reduced
Development
Time

Focused & Flexible

- Flexible and scalable design that is quickly configurable
- Significantly reduces prototype, verification, & validation time
- Networkable

Design
Simplification

Technology & Innovation

- Improved power efficiency
- Electronic driven noise dampening
- Embedded tube detection and position sensing
- Advanced optical sensor

Production
Ready

Production Ready & Scalable

- Modern PCB design layout
- Compact size and RoHS compliant, CE (in progress)
- Self monitoring diagnostics

Significant
Cost Savings

- >50% savings from reduced development time
- Customized components for target application
